

Strategy Overview

As of 3/31/25

NorthCoast Growth focuses on capital appreciation. Invests in leading growth stocks in favorable market environments. Scales to cash to preserve gains when unfavorable market risk is high. Positions are managed through a proprietary stock scoring system designed to build a comprehensive growth portfolio.

Primary
Objective
Long-Term
Growth

Secondary
Objective
Downside Risk
Protection

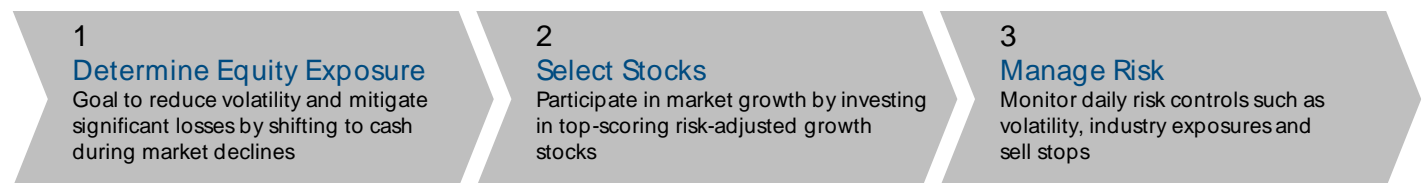

Active Management for a Changing Market

- People are living longer, and the road to financial security is only getting more complex. Investors require thoughtful solutions that properly balance the **financial tradeoff between portfolio growth and peace of mind**.
- A **thoroughly researched and systematic investment process** rooted in common sense will outperform over time. Our research shows that markets and securities reward certain factors and punish others.
- To capitalize on these factors, we employ a **market exposure model and a security selection model based on fundamental rationales**. These rationales are confirmed by thorough quantitative analysis, are systematically implemented and complemented with extensive risk controls.

Investment Process

Strategy seeks long-term growth with downside risk protection through the implementation of a systematic 3-step process

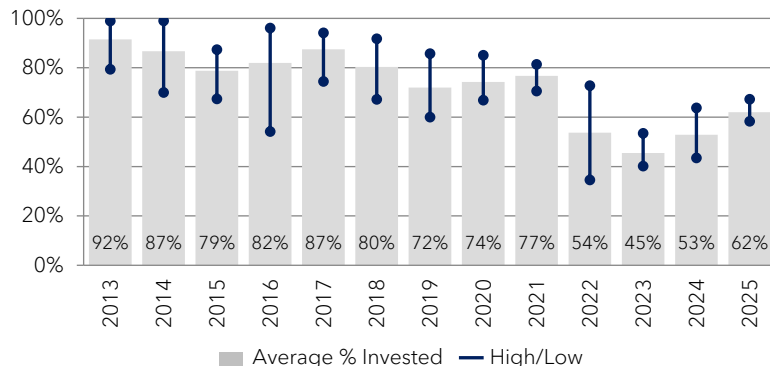

Strategy Benefits

Complementary	Low correlation to standard equity benchmarks
Defensive	Able to shift between 100% equity and 100% cash

Important Disclosure Information

Kovitz Investment Group Partners, LLC (Kovitz) dba NorthCoast Asset Management is an investment adviser register with the Securities and Exchange Commission under the Investment Advisers Act of 1940 that provides investment management services to individual and institutional clients. Effective June 1, 2024, NorthCoast Asset Management underwent an organizational change and all persons responsible for portfolio management became employees of Kovitz Investment Group Partners, LLC. Prior to June 1, 2024, NorthCoast Asset management was previously overseen by Focus partner Connectus Wealth since November 1, 2021. From 2008 until November 2021, the Firm was defined as NorthCoast Investment Management, LLC. The accounts managed at the predecessor firms are sufficiently similar to the accounts managed at NorthCoast Asset Management, such that the performance results would provide relevant information to clients or investors.

Past Performance is not indicative of future results. All investments involve risk, including loss of principal. NorthCoast Asset Management (NCAM) claims compliance with the Global Investment Performance Standards (GIPS®). GIPS® is a registered trademark of CFA Institute. The CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. NorthCoast Asset Management is a d/b/a of, and investment advisory services are offered through, Kovitz Investment Group Partners, LLC (Kovitz), an investment adviser registered with the United States Securities and Exchange Commission (SEC). Registration with the SEC or any state securities authority does not imply a certain level of skill or training. More information about Kovitz can be found at www.kovitz.com.

Net performance reflects the deduction of actual fees, up to 1.00% annually, applied quarterly (up to 0.25% per quarter). Performance results shown from November 1, 2012, through March 31, 2013, are the actual results of a single-account composite managed according to the dictates of the strategy. Since April 1, 2013, actual performance results are based on widely accepted performance standards and represent the net composite time-weighted return for the strategy. Returns are presented net-of-fees. Net-of-fee returns are reduced by trading costs and the portfolio's actual management fee. Valuations are computed and performance is reported in U.S. dollars. A complete list of composite descriptions is available upon request. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. To obtain a compliant presentation for the associated strategy, please contact one of our advisors at 800.274.5448.

Single account composite performance results reflect the results of actual trading using a single client account managed in accordance with the dictates of the program. Other accounts are excluded to prevent additions, withdrawals, and client mandated customizations from biasing the performance results. However actual client accounts are not insulated from these factors. Therefore, actual client accounts may have experienced investment results during the corresponding time periods that were materially different from those portrayed in the model. Account statements for the single account for the period are available for inspection upon request.

The information contained herein has been prepared by NCAM on the basis of publicly available information, internally developed data and other third-party sources believed to be reliable. This material is for informational and illustrative purposes only and should not be viewed as a recommendation or a solicitation to buy or sell any securities or investment products or to adopt any investment strategy.

Dynamic Hedged Equity is a tactical, long-term growth strategy focused on capital appreciation with a secondary objective of downside protection. The strategy invests in leading growth stocks during favorable equity environments and scales to cash to preserve gains when bear market risk is high. The strategy adheres to a flexible investment mandate that allows for allocation shifts that range between 0%-100% exposure to equities. Positions are managed (purchased and liquidated) through a proprietary stock scoring system designed to build a comprehensive growth portfolio.

Benchmarks - Aggressive Competitor Avg = Morningstar Aggressive Allocation Category Average. Aggressive allocation portfolios seek to provide both capital appreciation and income by investing in three major areas: stocks, bonds, and cash. These portfolios tend to hold larger positions in stocks than moderate-allocation portfolios. These portfolios typically have 70% to 90% of assets in equities and the remainder in fixed income and cash. Tactical Competitor Avg = Morningstar Tactical Allocation Category Average. Tactical Allocation portfolios seek to provide capital appreciation and income by actively shifting allocations between asset classes. These portfolios have material shifts across equity regions and bond sectors on a frequent basis. To qualify for the Tactical Allocation category, the fund must first meet the requirements to be considered in an allocation category. Next, the fund must historically demonstrate material shifts within the primary asset classes either through a gradual shift over three years or through a series of material shifts on a quarterly basis. The cumulative asset class exposure changes must exceed 10% over the measurement period. The S&P 500 Index is used for comparison purposes as it represents a sample of the 500 leading companies in leading industries of the U.S. economy. It is generally considered a proxy for the total market.
